# HALL OF SCOTTISH HEROES FOR WORLD'S FAIR.

STIRLING CASTLE.

Selected by Burns Cottage Association as model for Annex Building at World's Fair. Part to be used in the Decorated Hall shown in the upper left of the picture.

The buildings in the projected Scottish corner at the World's Fair are not to be limited to a mere reproduction of the simple clay biggin' at Alloway. While that will join its heart and center, the directors of the Burns Cottage Association propose to have a Hail of Scottish Heroes, part of which will be used as reception-rooms for visitors, part as a museum stored with portraits and rolles, and everything that will fifly recall the great past which the Kingdom of Scottand has played in history.

Of all places in Scottand Stirling is the most conspicuously national in its association propose to most conspicuously national in its association propose to have a Hail of Scottand and Scottand Stirling is the most conspicuously national in its association propose to have a Ball of Scottand and Scottand Stirling is the most conspicuously national in its association propose to have a Ball of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national in its association propose to have a Hail of Scottand Stirling is the most conspicuously national store.

Of all piaces in Scottand Stirling is the back of the plance adorned with strange of Guesand Start in the daily life of his gate, Mail strange of Queen Victoria had listen to their imprompting again until the dusy of Queen Victoria had listen to their imprompting again untill the dusy of Queen Victoria

of all places in Scotland. Stirling is the most conspicuously national in its associations. In the War of Independence, when Wallace and Bruce won nationality for their country against the powerful armies of the first Edward, Stirling was the key of the situation. Under its ramparts, Wallace won his greatest victory. To relieve Stirling Castle, Edward II moved norghward and offered battle to the heroic Bruce, with the result that this small, but sturdy Scotlish army drove his warriors in disorder from the field of Bannockburn, a name that has since been the mest glorious in the annals of the country. Bannockburn lies but three miles to the South of Stirling Castle.

In the heart of Stirling Castle, on the

At the foot of the castle decilvity to the east is Stirling bridge, where Wallace won his great victory over the English invaders. South of it is Cambuskennett Abbey, where Scottish kings lie buried. On the rolling ground to the south stretch the battlefelds of Scuthie Burn and Bannockhurn. Dunblane, with its fine old categories and the palace of the palace of the palace of the state of the palace is the creation of the "King of the state of the palace is the creation of the "King of the castle the palace is the creation of the "King of the castle the palace is the creation of the "King of the castle the palace is the creation of the "King of the subjects. Statues of great Scotchmen adorn its riches and the coping of the roof. It is a piece of crystallized history and romance.

gation of grand officers, will visit Elk Council | W. J. Knight, vocal and musical selections and electronary numbers, after which ice cream and methods being gatherings of various kinds, plenies with games, steamboat excursions, addresses by competent speakers, wearing of badges by the members and the decuration of halfs with the colors and symbols of the order.

West Plains Council was favored with an official viait from Deputy Jake Marx. It did much good, resulting in a stirring up of laterest in the community a general awakening of the members and the inauguration of a vigorous chward movement.

membership. South End Council bad a good time at its last meeting and everybody went home happy. A baseball club was organized and a challenge issued to Orage Council's team. The me int was entertainment with instrumental music by Reber's Orchestra and recitations by Chair N. A. Hoeck.

## OIL TEST WELLS PROVE BIG AREA.

WORK OF DEVELOPMENT.

All Wells So Far Drilled in Live Oak and McMullen Countles Have Proven to Be Good Producers. New Machinery.

Onkyllie, Tex., May 17.-The development of the oil lands of Live Oak, McMullen and Atascosa countles is being watened with great interest by the citizens of Onkville and of all Live Oak County because of the extensive holdings of the King-Crowther Corporation which is engaged in the work in this county. The most active development is being prosecuted in the neighborhood of Campbellton, near which place is situated the new town of Crowther, founded by the King-Crowther Corporation and designated as the principal office of that corporation and its affiliated corporations, the San Antonio and Crowther Railroad and the King-Crowther Pipe Line Coming been incorporated under the laws of Texas last week, one for the purpose of onstructing a railroad from San Antonio o Crowther and the other for the purpose f building a pipe line from Crowther to be Gulf Coast of Texas at either Rockthe Gulf Coast of Texas at either Rock-port, Corpus Christi or Aransas Pass, the Gulf terminus to be settled upon at an early day. The pipe line company will also build branch lines to San Antonio and other points which offer a prefitable market for the output of the oil fields.

Its Vast Territory. The King-Crowther Corporation holds eases on vast tracts of land situated in the three counties above stated, among its leases being the Whitsett, Yates, Brown. Jacobs and other large pastures comprising an aggregate of about 100,000 acres.

In addition to the vast bodies of land held under lease, the corporation has bought outright the Van Meter pasture in McMullen County, upon which oil was first discovered several years ago by Sam Crowther, who is vice president and general manager of the King-Crowther Corporation, and under whose personal direction and supervision the work of drilling and development is now being carried forward. The operations of the corporation have up to this time been confined to McMullen and to this time been confined to McMullen and Atascosa counties, in which wells have been sunk at widely distant points, and oil has been found in all the wells thus far put down. The discovery of oil in the wells covering such a wide expanse of territory is taken as convincing evidence of the oil-producing character of all the corporation's holdings, and hence the widespread interest of the residents and land owners of this section of the country in the operations of the concern.

section of the country
the concern.
Oil was recently discovered in a well sunk
in the Tom Orth pasture for the purpose of
securing a water supply, and this discovery
adds largely to the area of proved oil producing territory and is attracting attention
of other prospectors to this district.

011 of Fine Quality.

There has not been a great deal of information given out as to the character of the oil produced by the King-Crowther pleted within six weeks, and by early fall wells, but it is known that its quality is excellent, and the directors of the corpora-Such account and a very enthusiastic meeting Friday evening, the attendance being in united and onlike a number were promised for the next meeting. Think Council's meeting Friday evening was well attended, notwithstanding the extreme warms well attended, notwithstanding the extreme warms are completed in their declarations of pleasure and satisfactors. The united in the initiatine than of Hydr Fark Council one attended to the initiatine than of Hydr Fark Council one and the well and the construction of the product and the character and extent the proposal of the initiatine that meeting of Excelsion Council one and the well and the construction of the product and the character and extent the product of the field were emphatic in their declarations of pleasure and satisfactors. The unit of the initiatine that meeting the product of t tion who recently came from distant cities

# MANY WAGONS TO NEW COMPANIES MOVE MATERIAL.

KING - CROWTHER CORPORATION'S FIVE CARS RECEIVED BY KING - CROWTHER CORPORATION MAKES DEAL WITH SAN ANTONIO CROWTHER CORPORATION.

> New Machinery, Equipment and Piping for the Further Development of the Oil Fields South of San Astonio.

Karnes City, Tex., May 23.-(Special.)-Five car loads of machinery, piping and well drilling and finishing equipment have arrived here for the King-Crowther Corporation, thus adding over 200,000 pounds of new machinery and equipment to the already extensive outfit of the \$3,000,000 corporation, which is engaged in developing the oil fields of McMullen, Atascosa and Live Oak countles, with headquarters at Crowther.

Sam Crowther, manager for the cor-poration, who has been at Beaumont for poration, who has been at Beaumont for the last week selecting and closing negotiations for the purchase of a large portion of the new machinery which has just arrived, was also here yesterday to superintend and direct the loading of this enormous amount of material on wagons for its forty-miles jaunt across the country to Crowther, where a large force of men is awaiting to put it in position to perform its part in the development of the vast field which is owned or controlled in this section by the King-Crowther Corporation.

Scores of Big Teams.

In addition to twelve big mule teams belonging to the corporation, Manager Crowther has employed a score of teams belonging to farmers and stockmen in this the railroad station at this place to Crowther. It is estimated that there will be seventy-five wagon loads of 3,000 pounds weight each, to be hauled a distance of forty miles, and this will make things lively along the road from Karnes City to Crowther for the next two weeks.

Included in the consignment of material now being moved from here is a car load of piping from Pittsburg. Pa., to be utilized in well-boring operations which will be conducted on a scale more extensive than ever from now on. New wells will be speedily sunk and apparatus for the pumping of some already drilled will be put in place, with a view to making a thorough test of the capacity of the wells. There is also a complete rotary outfit, which will be utilized in the further work of development, and the promoters of this new field say that they will be prepared in a few weeks to show results which will have an important bearing on the oil markets of the country, both for lubricating and illuminating oils.

Survey for the Road. Included in the consignment of material

Mr. Crowther stated that the surveying orps of the San Antonio and Crowther Rallroad, headed by Mr. A. C. Pancoast, formerly city engineer of the city of San Antonio, and an experienced and practical civil engineer, would be in the field by Satand trains in operation.

Another project in which the King

# IN OIL FIELD.

LEASES SMALL TRACTS.

Opens Portion of Its Vast Holding to Other Companies, Which Will Aid Development-Judge Lewis at

Crowther.

Karnes City, Tex., May 31.-(Special.)-The King-Crowther Corporation has set apart 1,000 acres of its holdings at the town of Crowther for a townsite and for railroad terminals. This action insures the speedy building of the proposed San Antonio and Crowther Railroad from San Antonio, and will aid in the more rapid and profitable development of the oil fields in McMullen, Atascosa and Live Oak counties.

The surveying and plotting of the new townsite will be commenced as soon as surveyors can reach the ground.

The corporation has recently closed a lease contract whereby 500 acres of land in this field is transferred to the Blg Four Oil Company of Beaumont, Tex., which will inaugurate the work of development in a short while.

#### Still More Leases.

The corporation has also closed contract for the lease of an additional 500 acres to another company, the name of which the Express correspondent could not learn to-day. The King-Crowther Corporation owns and controls over 120,000 acres in this field. Sam Crowther, manager for the corporasection to assist in hauling material from tion, who had been in San Antonio for sevtion, who had been in San Antonio for several days looking after additional engines and machinery, came out Wednesday afternoon to superintend the loading of some of the recently arrived machinery on wagons to be taken to Crowther, where the corporation's work is being conducted on a larger scale than has heretofore been undertaken in any field in the State by a single company. In addition to the three cars of machinery which arrived here Monday from Beaumont, several cars of piping and other equipment have arrived from Pittsburg and other points, and there is work enough to keep a large number of teams busy for several weeks.

#### Londing the Machinery.

Manager Crowther directed the loading of a quantity of machinery which is required immediate use, and Thursday morning he was joined by Judge O. E. Lewis, vice president of the King-Crowther Corporation, who came down from San Antonio, and the two proceeded by private conveyance to Crowther, where Judge Lewis will remain until Wednesday next, going over the ground and looking after the details of the vast work that is in progress. Judge Lewis is also vice president of the San Antonic and Crowther Railroad Company, and one of the purposes of his present visit to the field is to select the ground for terurday morning, engaged in making the pre- minals, switches, depot, etc. He expects urday morning, engaged in making the pre-liminary survey for the projected road, and would have this preliminary work com-pleted within six weeks, and by early fall the company proposes to have rails laid and trains in operation.

construction.

The extent of operations being conducted by the King-Crowther Corporation in this section is attracting attention among all the people of this territory, and the recent discovery of oil on a tract of land beyond the holdings of the corporation has inspired confidence in the area of producing territory, and several parties are preparing to sink prospecting wells on their own account.

# PLEASANTON BIDS FOR A RAILROAD.

(Thursday, June 5.)

AND CROWTHER LINE.

Enthusiastic Meeting of Citizens Held to Discuss the Situation-Beaumont Companies Entering

New Oil Field.

Pleasanton, Tex., June 4 .- (Special.) -Pleasanton is after railroad connection with San Antonio, and at a mass meeting of citizens held in the Courthouse here Monday afternoon action was taken which demonstrated the purpose of the progressive citizens of this place to secure a rail-

When the announcement was made that Chief Engineer Pancoast and his corps of surveyors had begun the work of running a preliminary line for the San Antonio and Crowther Railroad, a meeting of citizens was called to discuss the situation and to take steps to ascertain upon what terms the line could be secured for Pleasanton. It was then made known that the proposed line of the San Antonio and Crowther Railroad was projected to run almost due south, which would leave Pleasanton three and a haif or four miles off the road. A committee was appointed to canvass the situation and correspond with the officers and directors of the San Antonio and Crowther enterprise, to obtain more definite information concerning their plans.

#### The Citizens Meet.

On Monday Judge O. E. Lewis, vice president of the San Antonio and Crowther Railroad, and Sam Crowther, manager of the King-Crowther Oil Company, arrived from Crowther, and as soon as their presence in town became known an adjourned meeting of citizens was called to consider the railroad situation, and Messrs. Lewis and Crowther were invited to be present. The meeting was called to order by District Attorney Martin, who stated the purpose of the meeting and called for an expression of sentiment from those present. Judge James Walton, William McKinnon, benefits and advantages that would accrue to the community from a railroad connecting with San Antonio and affording an outlet by rail. He dwelt on the necessity of action, and reminded his hearers of the

other by rail. He well on the accessing of action, and reminded his hearers of the fate of neighboring counties that had delayed too long when offered an opportunity to secure railroad connection, and had lost not only the railroad, but the Courthouse and a large portion of their population and wealth.

After a general discussion of the matter a desire was manifested to hear from the projectors of the San Antonio and Crowther Railroad, and Judge O. E. Lewis was called on to make a statement. He responded by saying that the railroad was a business enterprise projected in the interests of the King-Crowther Corporation and the purpose was to build the shortest and most direct line practicable to the field of operations of the corporation. To carry out this purpose, he admitted, would leave Pleasanton some distance off the route, but he said the company was willing to entertain a proposition to vary its course sufficiently to touch at Pleasanton.

\$15,000 and 20 Acres.

### \$15,000 and 20 Acres.

Upon this announcement being made Judge Lewis was requested to make known what consideration the company would demand for coming to Pleasanton, and Judge Lewis, on behalf of the railroad company, responded with the statement hat for a cash bonus of \$15,000 and the donation of twenty acres for depot and yard purposes, and the co-operation of the peo-ple of Pieasanton in securing the necessary right-of-way from the Atascosa County right-of-way from the Atascosa County line southward to Pleasanton, the course of the road would be surveyed so as to bring it to Pleasanton.

This proposition met with such enthusiastic approval that a large portion of the cash bonus was subscribed immediately and picdges were given insuring the raising of the remainder.

A committee of ten was appointed by the meeting to solicit the remainder of the bonus, to arrange for the depot grounds and conduct, the negotiations between the people of Pleasanton and the San Antoniand Crowther Railroad Company.

PROGRESS MOST

MARVELOUS

IN ALL AMERICAN HISTORY.

PRESS RECOGNITION MUCH THE BEST EVER GIVEN BY TEXAS PAPERS.

No oil company at any time in the history of this land has ever received such universal, unbiased, unpurchasable recognition from the local press as has the King-Crowther Corporation from the papers published in the territory where it operates. These journals have borne willing testimony to the fact that the King-Crowther Corporation has the most splendid oil domain in Texas, if not in the world, and is vigorously carrying on the work of transforming an uninhabited plain into a thriving field of industry, teeming with human activity and the mechanical devices for raising the golden stream of wealth that it may be turned into the markets of the whole earth. The King-Crowther Corporation feels legitimate pride in the words of praise and the liberal reporting of news from the oil region around the rapidly growing city of Crowther, published in all the newspapers, big and little, within a hundred-mile radius of the new oil kingdom.

Texas is now thoroughly convinced that the King-Crowther Corporation is the most aggressive, the most ably managed, and the most successful oil development company that has ever entered the State, and this public sentiment is admirably embedied in the columns of the San Antonio Express, the leading newspaper of Southwest Texas. Home testimony is, after all, the most valuable, and the excerpts from the great San Antonio paper reproduced herewith will give the Northern reader some faint idea of the high regard in which the King-Crowther work of development is held by those who are near enough to keep step with its marvelous

march of progress. And not only the newspapers, but the citizens of Southern Texas, are filled with enthusiasm for the King-Crowther operations. Everywhere there is the same story of pride and confidence in the work. The Corporation refers, by permission, to any bank, or firm, or business man of San Antonio, Pleasanton. Karnes City, Campbellton, Tilden, Oakville or Falls City as to its high standing in the industrial world. The railroad agents who handle the huge quantities of freight for the Corporation, the County Clerks who know of the deeds and leases, the postmasters, the liverymen, the lumber dealers—all who are in actual touch with the immense oil company—are of one mind, and that is that nothing like King-Crowther enterprise and King-Crowther solidity was ever seen in Texas. And these people-people who know-are free to express their conviction that this is only the beginning of a movement that is to surprise and startle the whole world. The progress made by the King-Crowther Corporation in developing its vast area of rich oil lands in three counties of

Southern Texas is the most marvelous thing in the history of American industries. Beyond question the work is the most extensive ever carried on by any single company in this country. This statement is made advisedly, and with a full recollection of the great operations in the fields of Pennsylvania and Ohio. Its truth is admitted by all who are near enough to its territory to be able to see for themselves. The testimony is overwhelming and convincing.

The King-Crowther oil fields are larger than any controlled by a single company in the United States. The Corporation's

the Ring-Growther on helds are larger than any controller by a single company in the Children States. The Corporation's equipment is more extensive and more costly, and the number of men now employed in developing its vast treasure-houses of oil—the highest grade luminant and lubricant—far exceeds that of any other development company in existence.

The actual money value, permanent and constantly growing, of this colossal field is greater than that of any other single field in this country. It stretches far into the millions, and can never depreciate in the slightest degree. It represents wealth

The fact that the King-Crowther Corporation is now leasing small tracts of its great holdings to other oil companies from

older fields is striking evidence of its vast superiority. The fact that the break in the Beaumont companies has already begun—two companies having signed leases of King-Crowther land, and a dozen others now figuring for them—is proof positive of the splendid value of its territory. The fact that experts from Pennsylvania and Ohio, having examined and tested the oil from the wells of this Corporation, are preparing to enter its field on long leases, is sufficient testimony as to the magnificent quality of its product. Nothing could be more conclusive than such manifestations of confidence as these. A special meeting of the full board of directors of the King-Crowther Corporation has been called for June 25 in Boston. The purp se of this gathering is to consider the advisability of advancing the price of stock to \$5 per share. It is felt

PRICE OF STOCK MAY SOON BE

the tremendous developments in the field, the building of a railroad from San Antonio to Crowther, the laying of pipe to the sea and the advantageous leasing of land to many established oil companies, justify this almost radical step. It is believed that the present price of \$2 does not adequately represent the great value of shares under present conditions. Whatever the outcome of the meeting, it is certain that the allotment of stock now being offered for subscription will soon be exhausted. The present price of this stock, \$2 per share, represents the most attractive investment now offered for public subscrip tion. There is not an investment now before the American people possessing a tenth part of its solidity. Every share represents an integral part of the greatest oil development corporation in the United States. These are statements of truth and soberness.

During the past week the Corporation has secured control of 32,000 additional acres of land adjoining its original holdings

of 91,040 acres, which now gives the Corporation absolute control of a single oil field covering an area of 123,040 acres, or 192 square miles. The oil produced in this greatest of all oil fields has been written down by experts as the richest produced anywhere in the world. Railroads are now stretching into this wonderful field. Pipe lines are making their way from it to the sea. Active development in every form is progressing with giant strides. The prophecy made some time ago that this stock would some day be worth as much as \$50 per share is apparently

soen to be realized. Conservative, careful investors are reminded that this is one of the rare opportunities offered during a lifetime. This stock has been on a stendy advance from the very beginning, and it will continue to advance in value from month to month and from year to year for many years to come. No man can to-day foresee the high-water mark of its ever-increasing value.

Of the present allotment of stock offered for public subscription, less than 40,000 shares now remain. These are being rapidly subscribed for, and the outlook is that a few days will see the entire allotment exhausted. Certificates are issued in lots of 100 shares or more. Cash in full settlement must accompany all orders. Remittances may be made by registered letter, Post Office or Express Money Order or certified check.
